

# AloneZone™ Independent Zone Control

Don't want to zone the whole system?  
Have small areas with over-conditioning problems?  
**The AloneZone™ is the answer!**

- ◆ **Conference Rooms**
- ◆ **Warehouse Offices**
- ◆ **Basement**
- ◆ **Computer Rooms**

- ◆ Controls over-conditioning of space independent of the HVAC equipment
- ◆ Utilizes Arzel® Insertable Dampers to control airflow into specific areas (zones)
- ◆ Only allows airflow when thermostat call matches available service
- ◆ Panel can be built to control one or more zones
- ◆ AloneZone™ monitors available service through direct connection to HVAC equipment "W, Y, G, C" terminals or field supplied duct sensor
- ◆ Powered by one 24-volt transformer regardless of the number of dampers being controlled
- ◆ Allows zone thermostats to stop flow of conditioned air once set-point is reached

**Control airflow without interfering with the HVAC equipment**

 **Arzel® Zoning Technology, Inc.**

# ZVI™ Control

## Zone Valve Interface

**Integrate  
Forced Air Cooling  
and Hydronic or  
Radiant Heat**

- ◆ Give your customers the same zoned comfort in cooling that you offer in heating
- ◆ Zones work together or independently
- ◆ Use one thermostat per zone to control both the heating and cooling
- ◆ Interfaces multiple manufacturers zone valves within a single system
