

Target Job Worksheet

Comfort Indicators

Observe : (Building and Lifestyle)

- Do you see heaters, fans, electric blankets? Are the upstairs windows open in the winter?
- Are occupants wearing sweaters?
- Is there a significant southern or western exposure? A great deal of glass? Cathedral ceilings?
- Are there multiple tenants using one thermostat?
- Are certain rooms uncomfortable due to their distance from the equipment?
- Is the space divided between interior and exterior rooms?
- Are registers in certain rooms closed? Does a fireplace affect the thermostat setting?
- Does comfort expectations exceed ductwork abilities? Is the HVAC system under or oversized?
- Are there special use areas (home office, computers, copiers, conference rooms, ect.)?
- Has there been an additional living space added (ie. finished basement, bonus room, etc.)?
- Do occupants vary in age and physical characteristics? Do health considerations require strict comfort control (ie. babies, elderly, sick, or those having heart and lung ailments)?

Ask : (Comfort Survey)

- Which Rooms are too hot or too cold? _____
- Are you forever opening and closing registers trying to balance your home's comfort?
- Does the sun affect one end of your home during the winter or summer causing any area of the home to be unbearable?
- Are you running expensive and potentially dangerous portable heaters or fans to be comfortable?
- Do you argue with your spouse about the thermostat? Your boss or coworkers?
- Does your furnace or A/C run constantly but never make the living/working space comfortable?
- Are there rooms that get little or no usage? Will any rooms become empty in the future as children move out or space needs change?
- Would you like to reduce your utility bill?

Recommendation :

- The Arzel Zoning System is Retro-fit friendly. Arzel's Dampers are wireless and motorless, which means they are quieter and more reliable than electric dampers. Arzel will Guarantee your comfort 100%!!!**

Arzel Zoning is the Answer!!!
