

The InsertaDamper™

*Boldly Going Where No Damper
Has Gone Before!*

The Insert-A-Damper™ is the newest labor saving damper
from Arzel® Zoning Technology, Inc.

This unique damper can be easily applied to counterflow slab applications as well as being installed through a round duct takeoff making retrofit zoning a snap!

Just make one access hole in the plenum and deposit the dampers into each run. The dampers are held in place by Arzel's patented Internal Damper Clamp. (U.S. and Foreign Patents Pending.)

- Dampers slip easily into existing ductwork, which means less mess, less installation time, and lower cost.
- Avoid cuts in walls and ceilings
- Dampers are controlled using low-pressure air. No grinding gears or motors to wear out.
- Available in round 6, 7, & 8 inch sizes.
- All Arzel products are backed by a 5-year parts and labor warranty.
