

HeatPumPro®

HeatPumPro® offers the latest in zoning control technology with its built in staging and software-based programming. The technology is the easiest and most cost-effective way of getting the maximum efficiency out of heat pump systems. The custom defaults are stored in memory so it is possible to commission this system with the touch of a button.

While the HeatPumPro® was originally designed specifically for heat pump applications, the flexibility of the software has made it possible to use it with other heating and cooling systems, such as a heat pump with electric backup, conventional, and dual fuel. Even single stage equipment can be zoned, because the HeatPumPro only needs to be reprogrammed when the system is upgraded, not replaced.

The HeatPumPro® is perfect for both new construction and retro-fit applications, offering the most versatile, cost-effective zoning system in the industry.

Product Information

Warranty

- All Arzel zoning systems are covered by a Lifetime Parts warranty.
- Simply register the system within 90 days of installation at www.arzelzoning.com/warranty

Technical Support

- Contact Arzel® at 800-611-8312 Monday through Friday 8 am - 5 pm EST with any technical questions or issues.
- Between the hours of 5 pm - 9 pm EST, Arzel offers after hours technical support. Call our direct line to get connected today.
- Visit www.arzelzoning.com anytime for more product information, videos, and other technical resources.

HeatPumPro®

Versatile Zone Control

Arzel Zoning
TECHNOLOGY
www.arzelzoning.com • 800-611-8312

Features

- Independent blower & compressor staging
- Outdoor Air Temperature (OAT) sensor
- Leaving Air Temperature (LAT) sensor
- LCD display
- Zone weight percentage
- Replaceable fuse protection
Easy to use lever style terminals
- Manual pump switch opens all dampers for testing

Panels

- PAN-HPP02 - 2 zone HeatPumPro Panel
- PAN-HPP03 - 3 zone HeatPumPro Panel
- PAN-HPP04 - 4 zone HeatPumPro Panel

Dampers

- Many different types of dampers to accommodate any new construction or retrofit application
- Stock dampers ship same day if order is placed before 2 p.m. EST
- Custom dampers usually ship within 24 hours

Benefits

Universal Compatibility

The HeatPumPro® works with any standard 24 volt system including split geothermal, heat pump, and conventional furnace and air conditioner. This makes the HeatPumPro perfect for both new construction and retrofit applications.

Custom Programmability

The HeatPumPro® is run by software so it allows you to program the system according to a homeowner's comfort needs. This makes it extremely versatile and gives the homeowner the opportunity to save money while increasing their comfort.

Minimal Bypass Required

By controlling fan speed independently, little or no bypass is required with the HeatPumPro® panel. Thus improving the efficiency of the equipment and saving the homeowner on utility bills.

Real-Time Reporting

The HeatPumPro® is equipped with a LCD screen allowing you access to real-time reporting of the system's activities. This will save time and

Versatile Options

The HeatPumPro® can be equipped with an optional solenoid to control the humidifier bypass damper. There is also a built in fossil fuel kit and advanced dual fuel technology included in the panel's software, eliminating the need for additional controls. These options make the panel the most cost-effective, efficient option to zone any home or office.
