

AloneZone™

INDEPENDENT ZONE CONTROL

**Control airflow
without controlling
HVAC equipment**

Don't want to zone the whole system?

Have small areas with over-conditioning problems?

The AloneZone™ is the answer!

GREAT FOR

- Conference rooms
- Warehouse offices
- Basements
- Computer rooms
- Any zone that needs a bit more temperature control

The AloneZone controls over-conditioning of space independent of the HVAC equipment. It does this by controlling Arzel® insertable dampers to control airflow into specific zones. The AloneZone will engage the dampers based on a thermostat call.

- The panel can be built to control one or more zones.
- AloneZone monitors available service by matching thermostat calls with duct temperature, using the factory-supplied duct temperature sensor.
- Powered by one 24-volt transformer regardless of the number of dampers being controlled.
- Allows zone thermostats to stop the flow of conditioned air when the set-point is reached.
